## 🧠 SKILLS

- C language
- Python
- Java
- Nodejs
- React
- HTML
- CSS
- SQL
- Javascript

## 📜 CERTIFICATES

- Data Science foundation certification
- Full Stack Development using MERN

## 🔑 INTERESTS

- Artificial Intelligence
- Web development
- UI/UX designing
- Designing
- Innovation

## 📁 PROJECTS

### **Portfolio**

- Technologies used : React js,CSS.

### **College TechSupport website**

- My project, College TechSupport, is an integrated platform designed to streamline technical support for students and staff within the college ecosystem.
- Through efficient issue reporting and assignment mechanisms, it ensures swift resolution of technical challenges, optimizing academic and teaching experiences across campus.
- Technologies used :  
Reactjs,CSS,Nodejs,Express,Mongodb.

### **CaloriScan**

- My project leverages CNN and YOLO algorithms to estimate calorie content from food images, providing a novel solution for dietary monitoring.
- Through image recognition, it accurately identifies food items and calculates their caloric value, offering a convenient and efficient tool for nutritional assessment and health management.

## 👔 PROFESSIONAL EXPERIENCE

### **MERN Stack Developer Intern**

During my internship at **Codegnan IT SOLUTIONS PVT LTD**, I engaged in a multifaceted role focused on web development, database management, and cloud deployment. Working with technologies such as MongoDB, Express.js, Node.js, React.js, and AWS, I gained practical experience and honed my skills in several key areas
